Thomas Sapp

SOFTWARE ENGINEER · FULL-STACK & SYSTEMS DEVELOPER

Phoenix, AZ 85053 • (480) 695-0519 • tpsapp@hotmail.com • github.com/tpsapp • linkedin.com/in/tpsapp

PROFESSIONAL SUMMARY

Software Developer and Systems Technologist with over 15 years of hands-on full-lifecycle application development experience spanning desktop, mobile, web, and enterprise automation. Holds a B.S. in IT with a Concentration in Programming Technology and active CISSP certification, pairing robust software engineering fundamentals (C#, Java, Python, C++, SQL, modern JavaScript) with rigorous enterprise security practices. Proven record architecting scalable multi-platform applications and developing mission-critical automation scripts that eliminate operational bottlenecks across thousands of enterprise users.

TECHNICAL SKILLS

Languages:	C#, Java, Python, C++, C, JavaScript, PHP, PowerShell, SQL, HTML5, CSS3, Visual Basic, Pascal
Frameworks & APIs:	.NET Framework / .NET Core, Android SDK, RESTful APIs, WordPress Custom Themes & Plugins
Data & Databases:	MySQL, Relational Database Modeling, Schema Design, Stored Procedures, CRUD Operations
Tools & Systems:	Git, GitHub, Linux, Windows, Active Directory, Azure/Intune, Splunk, ServiceNow, CI/CD Principles
Architecture & Core:	Object-Oriented Design (OOD), Full SDLC, Systems Automation, Secure Coding Practices, CISSP Principles

SOFTWARE ENGINEERING EXPERIENCE

Lead Developer & Software Architect — Sappsworld Programming

Sep 2011 – Present | Phoenix, AZ

- **Full-Lifecycle Software Development:** Lead end-to-end architecture, programming, testing, and deployment of custom client applications across Windows, Linux, Android, and web environments.
- **Enterprise Languages & Multi-Platform Delivery:** Engineer scalable applications using C#, .NET, Java, Python, and C++, enforcing object-oriented design patterns, memory safety, and modularity.
- **Full-Stack Web & Database Architecture:** Architect dynamic, database-backed web platforms utilizing PHP, MySQL, JavaScript, and custom WordPress implementations, ensuring optimized query performance and normalized data structures.
- **Custom Android & Linux Utilities:** Build standalone tools and Android applications targeting workflow optimization, offline sync, and real-time backend API integrations.
- **Client Collaboration & Maintenance:** Partner directly with business stakeholders to translate domain requirements into high-performance software specifications, managing version control via Git.

Senior Analyst / Production Support SME & Systems Automation — CVS Health

Apr 1998 – Present | Scottsdale, AZ

Promoted through technical leadership roles including Associate Manager (2022–2025) and Senior Analyst SME (2025–Present)

- **Process & Systems Automation:** Developed, debugged, and maintained enterprise PowerShell and Python scripts and custom desktop utility applications, automating complex system diagnostics and saving hundreds of support hours across 5,000+ local and remote systems.
- **Engineering Collaboration:** Partnered closely with infrastructure and engineering teams on enterprise-scale rollouts, system integrations, and migration pipelines ensuring software stability and minimal downtime.
- **Root Cause Analysis & Reliability:** Conducted in-depth technical investigations and root-cause analysis for mission-critical software faults, disaster recovery drills, and high-priority incident escalations.
- **Security & Policy Adherence:** Enforced strict enterprise cybersecurity compliance across corporate endpoints in alignment with CISSP protocols, Active Directory, and Intune governance.

EDUCATION

Bachelor of Science in Information Technology
Concentration: *Programming Technology*
Strayer University · 2016 – 2021

CERTIFICATIONS

- **CISSP** – Certified Information Systems Security Professional
- **ITIL Foundation** in IT Service Management
- **MCSE / MCSA** – Microsoft Certified Systems Engineer / Associate
